## Technical Skills

---

**Languages:** Python, C++, C#, Java, HTML, CSS, JavaScript, TypeScript, SQL and RStudio

**Frameworks:** Django Web Framework and React

**Algorithms:** Dynamic Programming, Divide & Conquer, Greedy, Graph Traversals (e.g. BFS, DFS, Dijkstra's)

**Other Software & Skills:** SQLite, Power BI, RDS, Git, Visual Studio, Hardware Abstraction, MS Office Tools, Linux Scripting, Concurrency, Bash, Agile Methodologies, SDLC, Google BigQuery

## Projects

---

### Implementation of Minimax Algorithm with HTML, CSS, and Javascript | Jan 2023

- Implemented Minimax, a backtracking algorithm, to create an [Unbeatable Tic-Tac-Toe Game](#)
- Algorithm implemented with JavaScript, and the responsive UI was made using **HTML** and **CSS**

### Chess Game with C++ Focusing on OOP Principles | Dec 2021

- Created an [Interactive Chess Game](#) with various difficulty modes via fundamental **OOP** principles
- Techniques include: Encapsulation, Inheritance, Observers and Decorators, RAII, Debugging, Automated Testing, MVC and Exception handling

### Personal Website with HTML, CSS, and Javascript | April 2022

- Applied **HTML**, **CSS** and **JavaScript** fundamentals to create a personal online [Website Portfolio](#)

## Professional Experience

---

### Geotab Inc - Software Developer | Jan 2024 – Apr 2024

- Developed robust **C#** and **.NET** applications, enhancing process efficiency, scalability and reliability
- Utilized **Google BigQuery** to retrieve and analyze large datasets, helping fleet managers find key information to improve processes.
- Designed and implemented a back-end API utilizing **C#**, coupled with a dynamic **Typescript** webpage, allowing fleets to seamlessly email HOS logs, enhancing UX and regulatory compliance.
- Practiced **CI/CD** to significantly enhance workflows, expediting feature deployment with heightened efficiency and reliability.

### Tigercat Industries - Software Developer | Jan 2023 – Apr 2023

- Designed, tested, documented and deployed applications and services using **C++**, **C#** and **.NET**
- Employed **multithreading** in **C++** and **C#** to efficiently retrieve and process device information.
- Used Hardware Abstraction techniques to create a **HAL** which facilitated the cross-compatibility between different operating systems and targets
- Constructed a **C++** module which facilitated the execution of simple queries on a SQLite database

### OnCall Health - Junior Solutions Engineer/Account Coordinator | Jan 2022 – Apr 2022

- Increased efficiency of back-end processes through **Python scripting** and **automation**
- Applied critical analysis to develop automated testing, achieving comprehensive test case coverage.
- Effectively worked with the **Django** web framework in order to modify and maintain client information and privacy

## Honours & Awards

---

- Consulting Case Competition | Toronto Dominion (TD) Bank – iD8 | Semi-Finalist
- University of Toronto National Book Award
- Aldershot Ontario Scholar Award & Governor General's Medal

## Education

---

### University of Waterloo - Computer Science | September 2020 - April 2025

### Wilfrid Laurier University - Business Administration | September 2020 - April 2025

*Double-Degree program*

- University of Waterloo President's Scholarship of Distinction | 2021
- Consistent Excellent Standing at both University of Waterloo and Wilfrid Laurier University
